

# BREEDING RESULTS

## ■ PYTHON MOLURUS BIVITATUS (BURMESE PYTHON)

*Ton Trags,*

*Stempel 33, 6372 NH Landgraaf,*

*The Netherlands.*

*Phone: +31-45-5327879.*

**Size of the terrarium:** 170 x 60 x 60 cm (lxwxh).

**Day and night temperature:** in summer 29-32 °C (day) and 24-27 °C (night), in winter 27-29 °C (day) and 21-23 °C (night).

**Copulation stimilus:** male and female are separated throughout the year. Animals were kept at 22 °C between October 1 and January 15.

**Age of parent snakes:** female unknown, male 3 years.

**Length of parent snakes:** female 250 cm, male 280 cm.

**Date of copulation:** January 30, 1997, ± 2.5hrs.

**Refusal of food by female:** yes, from February 22 1997 on.

**Date of egg-laying:** May 9, 1997.

Number of eggs: 17.

**Incubation temperature:** 30-31 °C.

**Date of hatching:** July 13-15, 1997.

**Number of young:** 17.

**Generation of young:** F1.

**Length of young:** 58 – 63 cm.

**First slough:** July 27 to August 6 1997.

**Force-feeding necessary:** no.

**First feeding of young:** July 25 1997.

**Remarks:** this is the first time the breeder has bred this species.

## ■ THAMNOPHIS SIRTALIS SIRTALIS BLACK

*J. van het Meer,*

*Chopinpad 34, 1323 RZ Almere,*

*The Netherlands.*

*Phone: +31-36-5361243*

**Size of the terrarium:** 110x60x40 cm (lxwxh).

**Day and night temperature:** in summer 29-32°C (day) and 24-27 °C (night), in winter 27-29 °C (day) and 21-23 °C (night).

**Copulation stimilus:** males were separated from the females for 3 months.

**Age of parent snakes:** male 7 years, female 6 years.

**Length of parent snakes:** male 120 cm, female 100 cm.

**Date of copulation:** unknown.

**Refusal of food by female:** yes, approx. four weeks before the young were born.

**Date of egg-laying:** -

**Number of eggs:** -

**Incubation temperature:** -

**Date of birth:** May 12 1997.

**Number of young:** 20.

**Generation of young:** F3.

**Length of young:** unknown.

**First slough:** unknown.

**Force-feeding necessary:** no.

**First feeding of young:** the first week.

**Remarks:** the breeder has bred this species before.

■ **ERYX COLUBRINUS**  
**LOVERIDGEI SAND BOA**

*J. van het Meer,*

*Chopinpad 34, 1323 RZ Almere,*

*The Netherlands.*

*Phone: +31-36-5361243*

**Size of the terrarium:** 60 x 70 x 30 cm  
(lxwxh).

**Day and night temperature:** in summer 29-32°C (day) and 24-27 °C (night), in winter 27-29 °C (day) and 21-23 °C (night).

**Copulation stimulus:** no.

**Age of parent snakes:** male 3 years, female 3 years.

**Length of parent snakes:** male 40 cm, female 60 cm.

**Date of copulation:** unknown.

**Refusal of food by female:** yes, approx. three months before egg laying.

**Date of egg-laying:** -

**Number of eggs:** -

**Incubation temperature:** -

**Date of birth:** September 14 1997.

**Number of young:** 4.

**Generation of young:** F2.

**Length of young:** unknown.

**First slough:** unknown.

**Force-feeding necessary:** unknown.

**First feeding of young:** unknown.

**Remarks:** the breeder has not bred this species before.
